WORK EXPERIENCE

Java Fullstack Internship

Kodnest

11/2022 - 05/2023

Collaborated with a cross-functional team of developers, designers, and project managers to work on real-world projects and gain hands-on experience. Developed and maintained web applications using Java as the backend programming language, implementing server-side logic and ensuring high performance. Utilized front-end technologies such as HTML, CSS, and JavaScript to create responsive and user-friendly web interfaces. Worked with popular Java frameworks such as Spring Boot to build robust and scalable back-end services for web applications.

PERSONAL PROJECTS

PLANT LEAF DISEASE PREDICTION
(01/2023 - 05/2023)

- In this Project, we use a machine learning algorithm which uses computer vision and image processing algorithms along with clustering techniques to analyses an input image and predict the disease.

Online Library Management System
(06/2022 - 12/2022)

- A college library management is a project that manages and stores books information electronically according to students needs. The system helps both students and library manager to keep a constant track of all the books available in the library. It allows both the admin and the student to search for the desired book.
